Smart and User-Friendly ID Card Printer

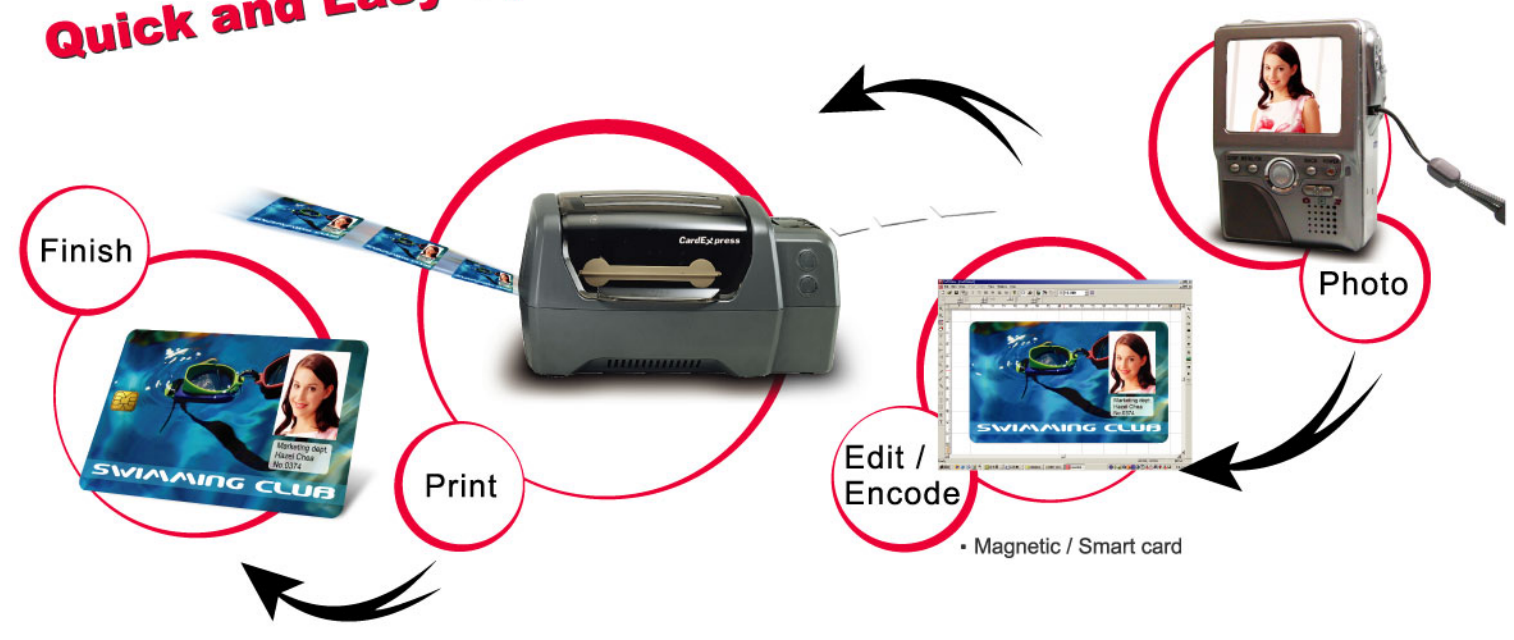

The new CardExpress produces high-quality photos, text, and barcodes on PVC cards through advanced dye-sublimation and thermal transfer technology. Breakthrough encoding technology simplifies the workflow allowing for simultaneous printing and encoding processes, saving you time and money. The CardExpress is the ultimate card printing solution for your security, identification and membership needs.

A Professional Look With Style

The CardExpress features a design that achieves the perfect balance between form and functionality. Its compact yet stylish appearance makes the CardExpress the perfect addition to your office setting. Two large control indicators located on the face of the CardExpress allows for convenient access to system status and operational control.

Quick and Easy Operation

Designed For Your Needs

The CardExpress is available in four models (CS-540s, CS-540m, CS-540i and CS-540c), each designed for your particular application needs. The CardExpress CS-540s is the standard ID card printer for your basic card printing applications. The CardExpress CS-540m encodes ISO 7811 high-coercivity and lo-coercivity magnetic stripe cards, while the CardExpress CS-540i encodes ISO 7816 contact smart chips. If your application demands for the encoding of both magnetic stripe and contact smart chip cards, then consider the CardExpress CS-540c. Whatever your application needs, there is a CardExpress designed for you!

Advanced Customization Software
 The CardStudio card design software is user-friendly and streamlined, allowing you to focus on the customization and creation of your cards. The software includes innovative features allowing you to import and print photos instantly from digital cameras or scanning devices.

Reliable Ribbon Cartridge
 The reliable ribbon cartridge guarantees an extended, trouble-free work process. While the easy lift design makes the ribbon replacement and maintenance processes quick and effortless. Maintaining your CardExpress is a 'tools-free' experience!

Quick-Connect Smart Card Coupler
 The smart card coupler is compatible with all ISO-7816-2 smart card readers, allowing for quick and simple encoding of data to smart card chips.

*Feature available on the CardExpress CS-540i and CS-540c models.

Optional and Consumable Items
 Optional items for the CardExpress such as cleaning kits, black ribbons, color ribbons, and spot color ribbons are available for your specific application needs. Using GCC ribbons will ensure consistency and quality from print to print, while maximizing the lifespan of the CardExpress. The cleaning kit is provided for the routine cleaning and maintenance of your CardExpress.
